

Calculator Number Line or Letter Line

copyright©RuthGrimes2005

- Use these templates to create your own Calculator number or letter line.
- Print and laminate the required number of circles.
- Add alternating blue and pink circles, to form Calculators body. Follow the title picture as a guide.
- Mark the circles with pen etc with numbers or letters.
- Place a blob of sticky tac onto the back of each circle so that the children can assemble them on your line.

Ideas for making a number line backdrop

Tape together 3 or 4 sheets of paper to make a long backdrop frame, so that the children can attach the number/letter balls on.

1. Glue assorted leaves over the paper or paint the leaves and take prints of them to decorate the background.
2. Tie a length of string from Calculator's head and one pink circle. Attach the written circles onto the line with pegs.
